

BAKED EARTH: THE TRUTH BEHIND AUTHENTIC IMPRUNETA POTTERY

5 TIPS FOR WINTERIZING YOUR TERRACOTTA POTTERY

1. Lift the pot from the ground by placing it on pot feet, wooden blocks or pieces of stone. This will allow air to circulate beneath the pot.
2. Seal the pot with a penetrating sealer, such as one used to seal slate floors and swimming pools
3. Remove plants and soil from the pot, as the soil will absorb water, freeze, expand and

can cause cracking

4. Cover the pot with plastic sheeting to avoid contact with water
5. Most fool-proof: move it inside
